Archive Quicken Information At Year-End In addition to making regular backups, many people are accustomed to organizing and storing their data files at the end of the year for safekeeping.. In the Archive File area, in the ' Give this archive file a name and location' field, change the Quicken-generated file name and location for the copy of the current data file (optional).

If there isn't room for all of your attachments, none of your attachments are copied.

Check your registers to see that the old transactions were removed What if the old transactions are still there?If creating a new year file didn't work as you expected, it could be because you haven't reconciled your previous year's transactions.. In the Current Data File area, click Do nothing In the Archive File area, in the Give this archive file a name and location field, change the Quicken-generated file name and location for the archive file (optional).. When you copy a Quicken data file with attachments, Quicken copies your Quicken data first, and then copies the attachments if there is room.. To ensure that nobody makes changes inadvertently, add a password To require a password to change the file but not to view the file, set a transaction password.

Note: Quicken doesn't require that you archive or close out your data file at the end of the year.. Because Quicken made a complete copy of your data file, open that file, reconcile your accounts, and then create another new year file.. Back Up My Files It's a good idea to back up your work each time you use Quicken, even if you have plenty of space on your hard disk.. Quicken then displays the File Copied Successfully dialog In the File to Use area, click File for New Year.. If you're archiving an invoice/receivables account, Quicken retains all transactions that haven't been completely paid off (such as unpaid invoices as well as invoices that were created prior to the date you specified but are linked to payments that fall within the new date range).

To view the data you just backed up, restore it. If your file contains invoice/receivable transactions (only in Quicken Home & Business), Quicken retains all unpaid transactions, such as unpaid invoices, as well as invoices created prior to the date you specified but that are linked to payments that fall within the new date range.. Select On my computer In the Select the disk drive and path to the backup folder field, identify the drive that contains the backup media.. Tell me more The current data file will include only transactions that occur after the date you specify as well as all investment and unreconciled transactions.. Click Change Note: For security purposes, the password you choose must be at least six characters in length.. In fact, not archiving your data at the end of the year lets you run comparison reports on income and expenses from previous years.. What happens next? Quicken creates the archive file and copies the historic transactions to it.. Click the link that corresponds to the operation you want to perform Archive a file. d70b09c2d4
